WAR MEMORIAL PLAZA, NASHVILLE, TENNESSEE

- 1) Approved a request for a revision in the source of funding on a project for **Exterior Upgrades** at the War Memorial Plaza, Nashville, Tennessee.

**Estimated Project Cost: \$9,050,000.00**  
*SBC Project No. 529/045-01-02*

STATEWIDE

- 1) State Architect Mike Fitts presented a request for approval of Delivery Order #1 and acknowledgment of the source of funding for **Energy Savings Performance Contracting** at the James K. Polk Building, with design and construction provided by Siemens Building Technologies, Inc. Mr. Fitts stated that this Delivery Order covered energy conservation measures coupled with much needed deferred maintenance items for the James K. Polk Center, a building that had the highest priority of need of FRF facilities. Comptroller Morgan explained that the original intent of ESPC was for short term projects to pay for themselves, and that a 15.7 year payback was longer than expected. Mr. Fitts explained that agency needs for improved operations and reducing deferred maintenance was the primary driver for the scope of this project and that quick payback lighting work was included to shorten the payback of the total project to 10.6 years. Comptroller Morgan explained that a good payback range would be 5-7 years. He added that care needs to be taken that this is not used as a way to do construction work and to get out of bidding projects. He said he didn't doubt that it needed to be done, but wanted to caution about using this process with a contractor. Mr. Fitts responded that we will be very careful and detailed with future requests for approval. Secretary of State Darnell asked if we will continue to allocate sufficient funds for maintenance such that the Department gets to keep the savings, and was told that these projects were funded by the Facilities Revolving Fund and any savings would go back into FRF's budget. Mr. Fitts said that we are building in a sophisticated monitoring system to tell us what is really happening and we will get a lot of information to measure the true savings for this project for future reference. After further discussion, the request was approved as presented.

**Estimated Delivery Order #1, Phase 1 Cost: \$4,000,000.00**  
*SBC Project No. 529/001-01-03*

- 2) Mr. Fitts began a discussion regarding the award of the **Management Assistance** contract. He stated that the Building Commission had approved an award to the best evaluated proposer, Parsons Brinckerhoff. However, the Department of Commerce & Insurance and their legal staff had opined that the State could not legally make the award because Parsons Brinckerhoff was not a licensed contractor. Mr. Fitts explained that the SBC had referred the matter to the Subcommittee, with authority to act, and asked that staff get with Commerce & Insurance and discuss their position and possible resolution. He said they met with the Assistant Commissioner and their legal council who, after lengthy discussions, remained firm in their posture in their original interpretation of the law, that a contractor's license was required for the proposers on this RFP.

Mr. Fitts explained that there were two issues being supported by the opinions of the legal council for Commerce and Insurance. The first is the opinion that a contractor's license is required. He said their opinion is supported primarily around the definition of "construction management" or a "construction manager". Mr. Fitts said that he defined a construction manager as one who is responsible and liable for the execution of the work, and C & I did not agree, thereby precluding an award to Parsons Brinckerhoff, who is not licensed. Basically, he said, the opinion was that the award could not be made to any of the proposers under the law. Mr. Fitts added that the Attorney General staff had looked at the issues and agreed that there was a support for both positions. He stated the second issue centered around the ability of any of the proposers to legally propose on this work should it be placed out for bid again based upon the statutory language. He stated that waiving the statutory prohibition was, in the opinion of C&I, discretionary with the Contractor's Licensing Board.

Comptroller Morgan stated that nobody met the bid requirements and, therefore, they need to go back out. Commissioner Goetz asked if there was a way the language of the RFP could be reconstructed to not require a license. Mr. Fitts replied they had presented that issue to C&I and they stated that, for the services we wanted, a license is required regardless of how phrased. Secretary of State Darnell mentioned that, unless we go to the Attorney General for an official opinion and prevail, it will be difficult to go forward. Mr. Fitts said they may want to ask for Attorney General opinion as this is going to have a ripple effect across Tennessee. Comptroller Morgan said that a six month extension with Heery makes sense. He said that it appeared to him that the State failed in its interpretation of the requirement for licensure and these folks should not be punished for being mislead and they should allow us to go back out and the original proposers have the ability to rebid.

Treasurer Sims made a motion to extend the Heery contract for six months under its original terms, ask the Contractors Licensing Board to approve the original proposers to rebid the work, if properly licensed, and authorize a rebid of the work. He added that if it takes more than six months they could bring the issue back to the Subcommittee for action. After discussion, the motion was approved without objection.
